

SUITE AT A GLANCE

Two Pillars. One Workflow.

Confluence for clean knowledge, Jira for clear delivery signals.

Outcomes

Who it is For

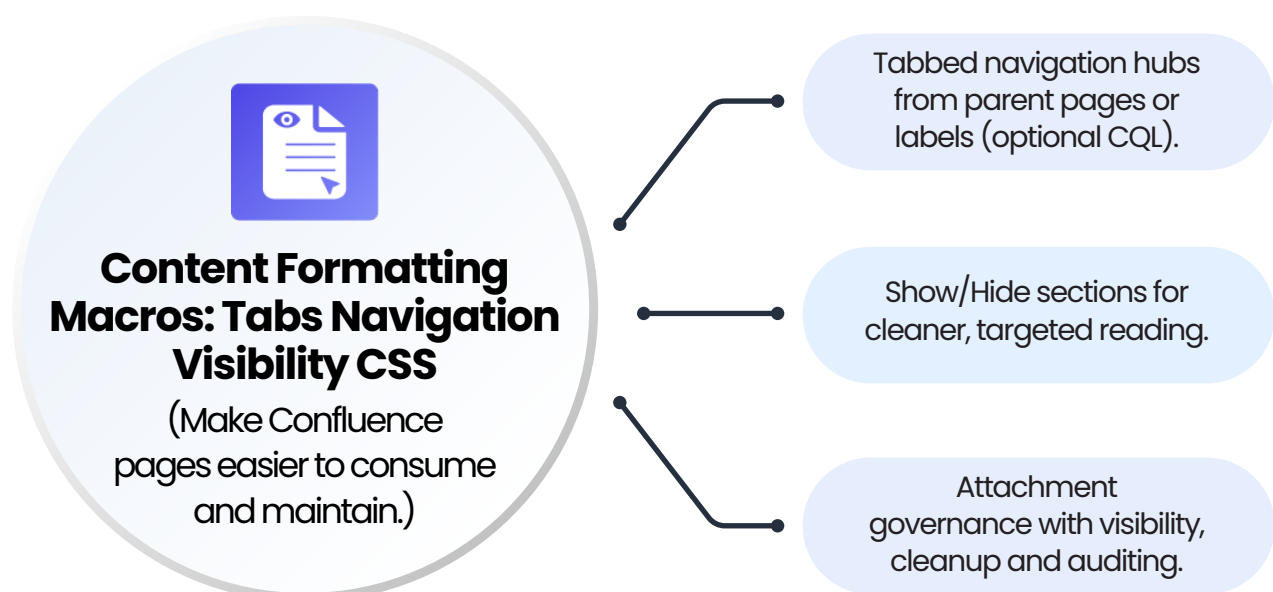

Suite Quick Wins (First Week)

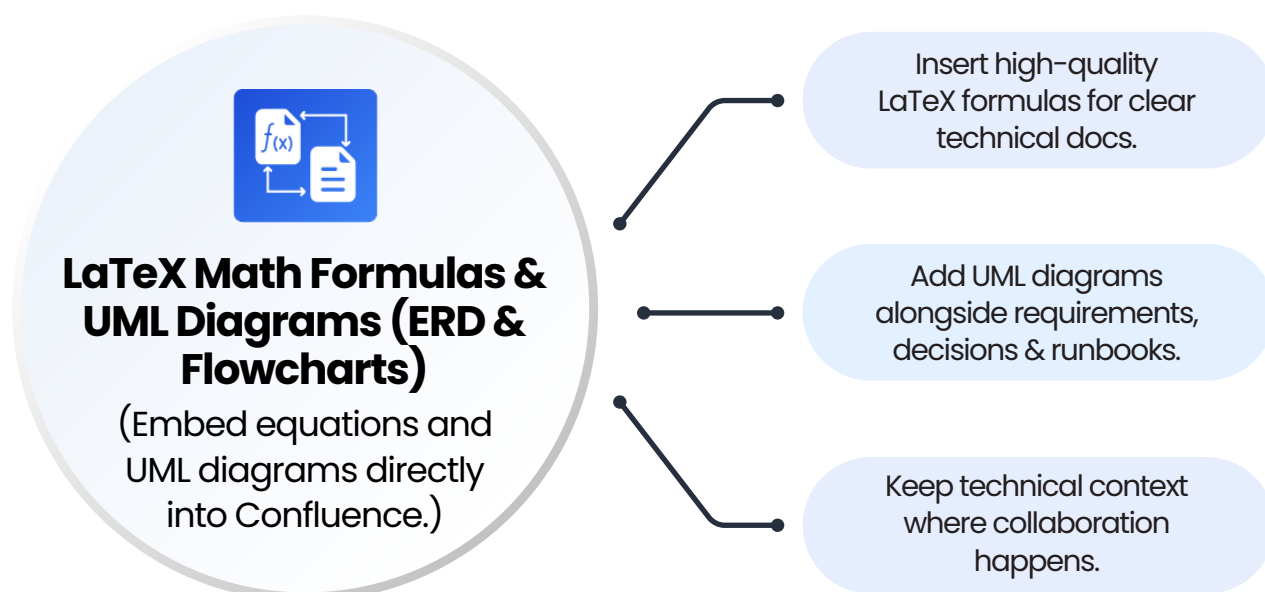

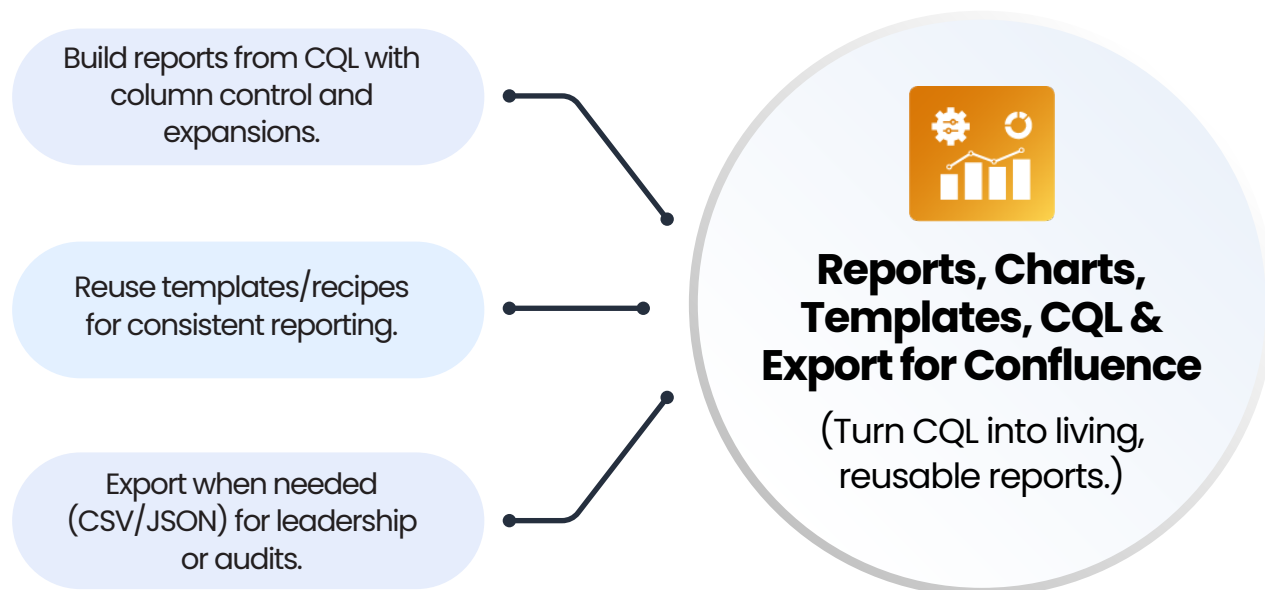

- Launch a Confluence homepage with tabbed navigation and role-based sections.
- Add a live Confluence report for status rollups and content governance.
- Create a Jira dashboard from JQL with charts plus a risk/blocked issue list.
- Run a lightweight planning pass: capacity vs workload, deadline risk, and a prioritization matrix.

The 5 Apps in the Suite

Each app is valuable alone. Together they create an end-to-end workflow from documentation to delivery.

Pillar 1 – Confluence Experience & Reporting

Pillar 2 – Jira Reporting & Delivery Planning

Dashboard Templates, Charts, Graphs & Reports for Jira

(Dashboards people actually use – from JQL, filters, or projects.)

Charts and issue views for delivery health and operations.

Reusable dashboard gadgets for teams and leadership.

Export-friendly reporting without fragile spreadsheets.

Capacity Planner: Workload vs capacity (holidays included), planner calendar, deadline risk, status / workflow aging, trends.

Time Tracking: Multi-user timesheets, charts, personal calendar, CSV/XLSX export, dashboard gadget.

Backlog Prioritization: ICE/RICE/WSJF templates, formula scoring, priority matrix, scoring history.

Portfolio Overview: Hierarchy across initiatives / epics issues, filters, exports.

Time Tracking, Resource Planning & Project Management

(Plan capacity, track time, prioritize work & roll up portfolio status.)

Adoption Playbook

A simple rollout path that delivers visible impact fast

Quarterly planning – Capacity + prioritization

- Compare workload vs capacity with holidays.
- ICE/RICE/WSJF scorecards and priority matrix.
- Portfolio rollups with filters and exports.

Project hub – Confluence space homepage

- Tabbed navigation to specs, decisions and runbooks.
- Role-based sections to reduce clutter.
- Live report blocks for rollups.

Leadership dashboard – Jira reporting

- JQL charts for progress, blockers and throughput.
- Issue list view for risks and aging work.
- Export-ready weekly ops reporting.

Why Clovity

Suite consistency
across apps.

Admin-friendly
standardization.

Adoption-ready
quick wins.

Reporting you
can trust.

Planning signals
that stay aligned.
